- Full Stack Web Developer By A2Z It Hub

Projects

NoteHive   Sep, 2023 - Jan, 2024

https://notes-hive-three.vercel.app/

NotesHive is a PHP-MySQL-based platform for students to share, access, and manage study materials with user authentication, categorized uploads, and search functionality.

- User Authentication – Secure login and access control.
- Notes Management – Upload, view, and organize study materials.
- Search & Filters – Quickly find relevant notes.
- Admin Panel – Manage users and uploaded content.
- Responsive Design – Optimized for all devices.

Auracity Furniture   Nov, 2024 - Dec, 2024

https://auracity-furniture.vercel.app/

Auracity Furniture is an EJS-based e-commerce website with user authentication, an admin dashboard, cart functionality, and a secure payment gateway, enabling efficient product and order management.

- User Authentication – Secure login and account management.
- Admin Dashboard – Manage products, orders, and inventory.
- Shopping Cart & Checkout – Smooth purchasing experience.
- Payment Gateway – Secure online transactions.
- Mobile Responsive – Optimized for all devices.

TechMantra

https://tech-mantra.vercel.app/

TechMantra is a MERN stack-based college event management system that streamlines event registration and payments via Razorpay. Participants receive a unique token upon payment, while an admin panel simplifies registration management.

- User Registration – Seamless event sign-up with a Google Form-like UI.
- Payment Integration – Secure online transactions using Razorpay.
- Token Generation – Automatic unique token issuance after payment.
- Admin Panel – Dashboard for managing and tracking registrations.
- Mobile Responsive Design – Ensures smooth accessibility across devices.
